(34) ① months      ② periods      ③ seasons      ④ times  
(35) ① discuss      ② interview      ③ received      ④ retired

- 【5】 次の文章を読み、(36)～(45)の問いに対する答えとして最も適切なものを、それぞれ下の①～④の中から一つずつ選びなさい。

“For the first time ever, one billion people used Facebook in a single day,” Mark Zuckerberg, the founder of Facebook, made this announcement on August 24<sup>th</sup>, 2015. Since October 2012, Facebook has had one billion users using the website at least once, but this was the first time that one in seven people in the world was using Facebook on the same day.

Zuckerberg and his friends started Facebook in 2004 when he was in university. It was started as an online list of personal profiles of college students so that they could get in touch with each other and make new friends. Soon after he started Facebook, he was a guest on an American news program and was asked about the future of Facebook. He explained that <sup>(1)</sup>they hoped to get between 400 and 500 people on the website. Eleven years later, he was the 10<sup>th</sup> richest man in the world and his website hit 1 billion active users a day. Zuckerberg wants Facebook to grow more in Asian and African countries and in South America where it is not yet very popular.

Facebook is not only trying to increase its membership, but it is also always looking to the future. When it started as a website for finding friends, that was a very original idea. Nowadays there are many websites and apps for <sup>(2)</sup>that purpose. Facebook is also exploring new uses of <sup>\*1</sup>AI (artificial intelligence). One example is how Facebook helps <sup>\*2</sup>visually impaired persons “see” pictures. Facebook can recognize objects in photos and writes a description of the picture and then it reads the description aloud to the user. Another example of how it uses AI technology is the way it connects users to services. It could happen that you are chatting to a friend about needing a ride to go somewhere. Facebook can read the text of your message and will connect you to a ride-sharing service like Uber or DiDi.

Facebook connects people globally and connects people with services. Another new plan it has is to make a <sup>\*3</sup>crypto currency, called Libra. With the Libra, you can buy and sell things online by putting your Libra into a wallet app and make purchases or you

can change it into cash at a local exchange point like a grocery store. Millions of people around the world who do not have a bank account can benefit from using the Libra. Facebook promises to keep the Libra service fees very low. Big credit card companies like Mastercard and Visa are interested in Facebook's crypto currency.

*Time* magazine chose Mark Zuckerberg to be the "Person of the Year" in 2010. Every year the news magazine chooses a person, a group, an idea or a thing that has done the most to bring about change in a year. They chose Zuckerberg because of his effort to make the world more open and connected.

(注) \*<sup>1</sup>AI (artificial intelligence) : 人工知能、A I

\*<sup>2</sup>visually impaired persons : 目の不自由な人々、視覚障害者

\*<sup>3</sup>crypto currency : 暗号通貨

(36) What Facebook achievement did Zuckerberg announce in 2015?

- ① A billion users were using Facebook for the first time.
- ② A billion users had logged on to Facebook in a single day.
- ③ Having billions of users was a great achievement.
