The words "climate change" are used to refer to changes in the Earth's global climate or regional climates. It describes changes in the average state of the atmosphere, or average weather, over any time scale from decades to millions of years. These changes can come from internal processes, be driven by external forces or, most recently, be caused by human activities. In recent usage, especially in the context of environmental policy, the term "climate change" is often used to refer only to the ongoing changes in modern climate, including the average rise in surface temperature known as global warming.

- (1) What does "climate change" mean?

【1 B】次の英文を読み、(6)~(10)の質問に対する答えとして最も適当なものを、それぞれ下の①~④から1つ選び、番号で答えなさい。

Climate changes reflect variations within the Earth's environment, natural processes going on around it, and the impact of humans. The external factors that can shape climate are often called climate forcings and include such processes as variations in solar *radiation, the Earth's orbit, and greenhouse gas. More generally, most forms of internal changes in the climate system can be recognized as a part of history. This means that the current state of climate reflects not only the inputs, but also the history of how it got there. For example, a decade of dry conditions may cause lakes to shrink, plains to dry up and deserts to expand. In turn, these conditions may lead to less rainfall in the following years.

注: *radiation = 放射線

【3】次の英文の (26) ~ (35) に入る最も適当なものを、それぞれ下の①~④ から1つ選び、番号で答えなさい。

Pidgin or Hawai'ian Creole English originated as a form of communication (26) between non-native English speakers in Hawai'i. It replaced the pidgin Hawai'ian spoken on the plantations and (27) in Hawai'i. It has been influenced (28) many languages, including Portuguese, Hawai'ian, and Cantonese, a Chinese language. Pidgin contains words from people of various language backgrounds that were brought in to work in the plantations, (29) as Japanese, Filipinos, and Koreans. There are (30) Japanese loanwords in Pidgin that have different meanings from the original Japanese, for example, Spam musubi. It has (31) been influenced to a lesser degree by Spanish spoken by Mexican and Puerto Rican settlers in Hawai'i. Even today, Pidgin (32) some influences from these languages. For example, (33) referring to a temporary state or location, the word "stay" in Pidgin has the same meaning as the Portuguese verb "ficar", meaning "to stay". Sometimes the grammar of the language is (34) from that of Portuguese. For example, "you like one knife?" (35) "would you like a knife?" The reason the word "one" is used instead of "a" is because the word "um" in Portuguese has two meanings; "um" translates to "one" and "a" in English.
